 Shyamoli, Mohammadpur, Dhaka

CAREER OBJECTIVE

To work in an environment that encourages the use of my skills and education while gaining valuable experience and contributing to the company's success. Eager to apply my knowledge of networking technologies and collaborate with a team of professionals to achieve organizational goals.

EDUCATION

Bachelor of Computer Science and Engineering
University of South Asia | CGPA: 3.97

2021-2025

VENDOR CERTIFICATION

- MTCNA (MikroTik Certified Network Associate)

PROFESSIONAL COURSE

- CCNA (Cisco Certified Network Associate)
- RHCSA (Red Hat Certified System Administrator)

EXPERIENCE

i. Network Engineer

Tahoe Communication Limited | February 2026 – Present

- Configured and managed FortiGate Firewalls, including SSL VPN, DDNS, and Fortinet-based centralized log management solutions.
- Deployed Nagios and Zabbix monitoring servers on Ubuntu using a Proxmox VE virtualization platform.
- Implemented and maintained enterprise network solutions, including BGP routing, IPsec, SSTP, GRE & L2TP VPNs. Also Starlink integration using MikroTik Router.
- Project-based LAN and Wi-Fi solutions, including wireless access points (Ruijie, Grandstream, Edgecore & NETGEAR)

ii. Jr. Network Engineer

Aamra Networks Limited | June 2025 – January 2026

- Provided onsite and remote support to corporate clients.
- Configured and maintained MikroTik routers & Cisco switch in production environments.
- Implemented PPPoE, GRE, IP-IP, PPTP, L2TP, NAT, Firewall, VLAN, BGP, Bandwidth Control, Mangle, Failover and Port-Forwarding.
- Troubleshoot network issues including high latency, packet loss, routing errors, website inaccessibility, slow bandwidth, and DNS-related problems.
- Monitored and analyzed network performance using Nagios, identifying potential issues and ensuring smooth and reliable network operations.
- Communicated with clients via calls, email, and WhatsApp, ensuring timely issue resolution and proper tracking through the ticketing system.

iii. Support Engineer (Internship)

Race Online | January 2025 – April 2025

Summary: Gained hands-on experience in enterprise network operations, including network monitoring, MikroTik routers, OLT devices, and ticket-based troubleshooting.

SKILLS

CCNA

TCP/IP | Subnetting (CIDR, VLSM) | VLAN & Inter-VLAN | STP | Routing Protocols (Static, RIP, OSPF) | DHCP | ACL | NAT | GRE | IP SLA-based failover | Ether-channel | Layer-2 Port Security | Telnet & SSH

RHCSA

Disk Partitioning (Standard & LVM) | Firewall & SELinux basics | Cron job & at | NTP & SSH Time Sync | NFS & Samba | VDO & Stratis | DNS (Primary & Slave) | Web Server (Apache single & virtual hosting) | Mail Server (Postfix + RoundCube) | Nagios & Zabbix Configuration.

Project

- **Fortinet Centralized Log Analyzer**

Platform: Proxmox | Ubuntu Server Edition (22.04.5 LTS)

Summary: Collected FortiGate logs via rsyslog on ubuntu and parsed them into structured data using python (Perser). Stored data in PostgreSQL and build a Flask (Gunicorn) backend with Nginx to deliver a secure real-time monitoring dashboard.

- **ISP-Integrated Enterprise Network with Dual WAN Redundancy**

Platform: PNATLab

Summary: Implemented a MikroTik ISP core router connected to client side Cisco device based network. Configured dual WAN with BGP, OSPF, Inter-VLAN routing, VLANs, NAT, ACL, Layer-2 security, SSH management, and TFTP-based configuration backup.

EXTRACURRICULAR ACTIVITIES

- Microsoft 365 (Word, PowerPoint, Excel, Outlook)
- Research & Development: Packet tracer, EVE-ng, PNATLab
- Problem-Solving ability
- Communication Skills
